EMPLOYMENT

Software Development Engineer intern	Dtoxd.ai	June 2019 - May 2020
---	-----------------	-----------------------------

- Worked as part of the product development team, and built a chrome extension for filtering explicit texts from websites in real-time.
- Collect the data and cleaned for building the LSTM model(NLP). On-device deployment of ML models using TensorflowJS and Nodejs.

Data Scientist intern	Occipital Tech	March 2019 -May 2019
------------------------------	-----------------------	-----------------------------

- Worked as a part of the core development team and built a dataset for modeling. Involved in GUI development using flask and python.
- Worked on the Openvino framework to optimize different Deep Learning Models. Deployment of various Application based models.

Microsoft Virtual Internship

- Worked on various interpersonal skills and Understands the work culture of Microsoft.
- Acquired various skills like Work Ready skill, Technical Engineer skills, Campus to corporate work-ready skills.

Languages and Technologies

- Programming Languages - C++ (Advanced), Python (Intermediate).
- Operating System - Linux, Windows, Android.
- Database - MySQL, Firebase.
- Frameworks and tools - Tensorflow, Android Studio, LSTM, GitHub, NLP, RNN.
- Others - Machine Learning, and Deep Learning, App, and Web Development.

EDUCATION

Navi Mumbai, India	Fr.C.Rodrigues Institute of Technology	July 2016 - May 2020
---------------------------	---	-----------------------------

- B.Tech. in Information Technology. CGPA: 9.13/10.
- Main coursework: Advanced Data Structures and Algorithms, Design, and analysis of Algorithms, Computer Architecture, Artificial Intelligence, Database Systems, Operating Systems, Software Engineering.

B.TECH. MAJOR PROJECT

- Build an automated AI WebApp that predicts what type of disease a person is suffering from. Then it will find the nearest hospital located in the area using efficient shortest path algorithms.
- Build an AI-based application that provides a clean environment for the user to surf on the browser and on the desktop using NLP with python and tensorflowjs.
- Build a chatbot using movie dialogues as a database. It involves preprocessing and model building using NLP.

ACHIEVEMENTS AND RESPONSIBILITIES

- Winner of the INNOVATIONS, A National Level Project Competition at SIES Graduate School of Technology. Participated in Codevita, Google Kickstart Competitions.
- Hackerrank (6 stars) World ranking below 15000 and CodeChef 2 star.
- Specialization in Data structures and Algorithms from Coursera.
- Grand Finalist of the Smart India Hackathon 2019 and led the team as a Team Leader.
- Won 2nd Prize in Intercollegiate Technical Presentation conducted under Pre-Event CSI Technext at IIT Bombay.
